

Industrial Scrap Management Program

SA Recycling provides industry and manufacturers with all the tools necessary for a successful and profitable recycling program. Our trained staff of professionals can provide your company with a full array of the programs and services necessary to provide the best in management practices. We will assess your current operations through a complete scrap audit and outline a Scrap Management Program that maximizes your return on scrap revenue, while protecting your environmental needs.

Our emphasis on service, value and protection in all areas of your operation provides a program that gives you peace of mind in knowing that you're getting a superior level of service and support. Our programs are built on prompt, professional service, complimented with competitive pricing, value, and environmental integrity.

QUICK AND EASY ACCESS TO YOUR ONLINE ACCOUNT.

Scrap Information Portal (SIP)

This tool is all day, 365 days a year, via internet access at no additional charge. Allows you to access your scrap recycling account information such as vital information including shipment and payment of your scrap loads. Its easily accessible for use in managing your scrap revenues, weights, receivables, and associated documents. In addition you can access data in specified time ranges, as well as having the ability to drill down into specific shipment and payable details.

Accessible Information Includes:

- Shipment views (by date range)
- Date of Shipment
- Destination Weights
- Copies of scale tickets
- Shipment detail
- Total quantities shipped
- Scrap prices
- Scrap value per unit measure (ton, pound, etc.)
- Extended values
- Amount due
- Amount paid
- Payment views (by date range)
- Check facsimilies with itemized detail
- Payment status
- Balances due

SA Recycling's "Scrap Information Portal" tool, all of your historical scrap data is readily available to you and your staff. No more searching for receivables. This tool will save you time and improve the efficiency and accountability of your scrap recycling program. Furthermore, this is an excellent tool to help manage documentation as required by Sarbanes-Oxley legislation.
