CARBON PLATE STEEL PRODUCTS

CARBON PLATE STEEL PRODUCTS

Providing services nationwide, Carbon Plate Steel Products is a leading supplier of secondary steel plates. We are prepared to fill your order immediately and ship anywhere in the country. To learn more about our our products, and how to place an order with us today, please contact our team directly.

What Is Secondary Steel Plate?

We specialize in commercial quality steel plate. Our steel plates generally range in thickness from 3/16 inch to 4 inches. At times, we even have access to plates up to 10 inches in thickness and come in a variety of lengths and widths. Our steel plates are hot rolled mild carbon shipped to us directly from the mill. These plates do not come with Mill Test Reports, but full chemistries are available and Independent Test Reports can be performed on each. We can also conduct Brinell Hardness (BNH) test for material hardness.

Our Secondary Steel Plate Is in Stock and Ready to Ship

At Carbon Plate Steel Products, we not only want to be your go to secondary steel plate supplier, but we also want to assure you that we have the secondary steel plates you need in stock and ready to ship. Our inventory is regularly updated so that you can see exactly what we have in stock at any time. We maintain various dimensions of secondary steel plate as is used by numerous industries.

Once you place your order, we immediately go to work filling it. This means that you'll never have to deal with excessive delays or slow shipping times after you place your secondary steel plate order. We know how important your time is.

Due to our excellent quality, fair pricing and close association with transportation companies for aggressive pricing, our materials are used extensively by fabrication shops, OEM's, construction crews, road crews and agricultural applications. We are also capable of rip cutting plates to your required size prior to shipping.

Most standard inventory consists of products in 96" x 240", but we have a good assortment of off gauge thickness, lengths and widths as well. These plates are supplied with full chemistries. We also disclose the carbon and Manganese content directly on our inventory listing.

Locations

- 250 US 12 East, Burns Harbor, IN 46304
