

Industrial Scrap Management Program

SA Recycling is known for its prompt, professional service. We design and manage custom metal recycling programs for a variety of industries and manufacturers, including some of the largest companies in America. We provide scrap metal collection bins tailored to your specific needs, a dedicated fleet of trucks to ensure prompt service, and personalized customer service from experienced professionals.

Our network of direct consumers enables us to pay top prices for both ferrous and nonferrous scrap. We add value through transparency, integrity, and environmental downstream protection.

Our robust safety program ensures that our personnel performing services at your facility will do so with an eye towards safety.

Industrial Services and Programs

- All types of scrap collection containers available, including custom sizes.
- Dedicated Dispatch Service to facilitate a prompt response.
- Scale-mounted overhead cameras.
- Thorough sortation and documentation of mixed materials.
- Unmatched flexibility / custom solutions to meet your needs.
- Prompt Payment Terms tailored to your needs, backed by SA Recycling's financial stability.
- Accounting made easy.
- Certified Destruction of sensitive scrap materials to protect proprietary interests and mitigate liability.
- Scrap Management Audits are available upon request.

QUICK AND EASY ACCESS TO YOUR ONLINE ACCOUNT.

Scrap Information Portal (SIP)

Access your historical load and payable info via secure login 24/7/365. This customized internet service allows you to manage your scrap revenues, weights, receivables, and associated documents. You can access data in specified time ranges, and drill down to specific shipment and payable details.

Accessible Information Includes:

- Copies of scale tickets.
- Shipment views by date range.
- Reports by commodity.
- Date of Shipment.
- Gross, Tare, and Net Weights.
- Scrap value per unit measure (ton, pound, etc.).
- Balances due.
- Payment views (by date range).
- Check facsimilies with itemized detail.

With SA's SIP tool, all your historical scrap data is readily available to you and your staff. No more searching for receivables. This tool, supplemented as needed by our customer service representatives, will save you time and improve the accountability of your scrap metal program. Furthermore, this is an excellent tool to help manage documentation as required by Sarbanes-Oxley legislation.
